

500 verified registrations.

7 days · ₹2,000 · one focused growth engine

Trusted campus connectors + a referral console that measures unique sign-ups.

FINAL-YEAR STUDENTS

FREE WORKSHOP

THE TARGET

500

unique registrations

Built for a 48-hour submission; campaign itself is a 7-day simulation.

Start with one clear student need

A final-year engineering student needs a project they can explain during placement or internship interviews.

WHO

Final-year engineer

Start with CSE/IT and adjacent branches. Distribute through class groups, clubs and placement communities.

WHY NOW

Interview readiness

AI interest is high, but “what can I build and show?” is the sharper job to be done.

WHY REGISTER

A concrete outcome

A free 60-minute session to build a first AI project and learn a next portfolio step.

Message: “Build your first AI project in 60 minutes.” Add date, time and any extra benefits only after NxtWave confirms them.

Two trusted routes to 500

Prioritize existing campus relationships; use peer forwards only as upside.

ROUTE 1

20 connectors × 18

360 registrations from class reps and student ambassadors.

ROUTE 2

7 clubs × 30

210 registrations from tech clubs and placement groups.

360 + 210 = 570 gross – 12% assumed ≈ 502 unique

Track duplicates and eligibility before calling the target achieved. The 12% adjustment is an estimate, not observed data.

Campus Referral Console

The live prototype shows distribution, attribution and quality control end to end.

Demo proof: repeat the same sample registration; gross increases, unique stays unchanged. Display sample data as a prototype.

Three tests that change the plan

These are proposed experiments for a real launch; no students were contacted in this simulation.

01 TRUSTED SENDER

Class representative vs. club admin in matched groups

METRIC / Verified registrations per 100 eligible students reached

02 SPECIFIC OUTCOME

“Build a project” copy vs. a general free-workshop message

METRIC / Verified registrations per link click

03 ONE REMINDER

One useful reminder vs. no reminder in comparable groups

METRIC / Incremental verified registrations per 100 reached

₹2,000 CEILING

₹1,000 connector rewards
₹500 creative support
₹500 contingency

WHAT CHANGED

The asset now shows source attribution and duplicate checks. All demo numbers are visibly synthetic.
